

Transvaal Department of Agriculture: Bitter-Pit of the Apple (Classic Reprint)

Filesize: 7.79 MB

Reviews

It is straightforward in go through easier to recognize. I actually have study and that i am sure that i will going to study yet again again down the road. Once you begin to read the book, it is extremely difficult to leave it before concluding.

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from **Transvaal Department of Agriculture: Bitter-Pit of the Apple** In February, 1906, my attention was drawn by Mr. C. P. Lounsbury, the Government Entomologist, Cape Colony, to a peculiar spotting in Cape apples. The trouble was known locally simply by the name of bitter-pit, and as it is now so commonly recognised under this name I do not propose in this report to substitute any other, although there are certain objections to the term here employed. In the following month, Mr. Lounsbury conducted me over the orchards of the Cape Orchard Company at Hex River, where the spotting was very evident both on the fruit on the trees and also on the apples which were in cold storage. The prevalent theory in vogue regarding the trouble at the time was that it was due to a mechanical injury brought about by blown sand. A number of varieties of affected apples were then collected for microscopic examination, and as the disease was one of such general importance, arrangements were made with the Cape Department of Agriculture that I should devote as much time as I could spare to an investigation of this trouble. The Cape Orchard Company also very kindly undertook to place the necessary facilities, in the shape of conducting experiments at their orchards, at my disposal. An exhaustive histological and bacteriological examination of these spots was first carried out, but neither revealed any evidence of fungi or bacteria. In the histological part of the enquiry, however, a great abundance of starch in the diseased areas at once suggested that the action of diastase must be inhibited in some way or other, and that possibly some...
